Jim:

Subject: Contract HF-32-27

Attached please find the termination inventory on the subject contract. This corrects and supercedes the inventory which was furnished you in December 1959. The inventory is composed of two schedules: Schedule 1 is the inventory of Government-Furnished Equipment; Schedule 2 is other residual inventory located here. You will note that in both cases we have made some diversions to other contracts. Where we have stated "transfer to _____", it is necessary that the contract referenced be amended to pickup the transfer. In some cases these transfers have already been documented, in which case we have used the terminology "transferred to _____".

You will note on page 3 of Schedule 2 we have indicated that we would credit our claim for the three books which were purchased under the contract. You may take this as your authority to reduce the claim by \$25.00 for these items.

We would appreciate receiving formal disposition instructions for the items not covered in the diversion column so that we may clear the inventory from our warehouse.
